

Attention i5/OS V5R4 or Higher Users

Changes in DDM communications in i5/OS V5R4 and higher affect the following Help/Systems Graphical User Interface (GUI) products: Robot/CLIENT[®], Robot/NETWORK[®] V9 (supported on V5R4 only), and Robot/SAVE[®]. To enable communication to a V5R4 or higher System i, client systems may require a configuration change. The Help/FACTS, “Changes for Help/Systems GUI Products on i5/OS V5R4 or Higher,” describes the requirements for Windows and other client systems. Download the Help/FACTS from the Help/Systems Web site:
